

**Learning how to be a great communicator
is challenging enough.**

**Training your team to effectively communicate
is an entirely different skillset.**

How many times have you listened to one of your team members and thought...

“Where is this going?”

“What’s your point?”

“When will it end?”

Simplifying complex information. Commanding a room.
Making messages matter.
All essential skills that drive business success.

That’s where we come in.

**3D helps you
teach, embed, and sustain
communications excellence
across your team.**

Our Train-the-Trainer programs focus on *five key components* of effective communications.

VERBAL—the words they say

WRITTEN—the words they write

PHYSICAL—the way they deliver

VISUAL—the way they bring their words to life

EMOTIONAL—the connection they make...
to their words and audience

Let 3D help you make
communications excellence part of your team.
